Lipotropic agents are classes of substances that play an important role in the body's control of fat. Through their involvement in lipid/fat metabolism, they can help maintain a healthier liver. The liver plays an important role in human metabolism and has a number of important functions, including glycogen storage, plasma protein synthesis and detoxification. The liver also produces bile, a compound which aids in digestion and the breakdown of fats. Lipo-B Plus injections include a combination of important amino acids and vitamins and using these injections, along with proper diet and exercise, can help you reach your goal weight faster by giving you an extra boost. Here are some of the benefits:

Increases and speeds up your metabolism

Reduces and burns stored body fat

Increases energy and drive

Maintains a healthier liver

I have read this information sheet about the Lipo-B Plus injections I wish to receive. I will ask questions, if I have any, before getting the injection.

I agree to remain at the clinic for at least 10 minutes after my injection.

I hereby consent to the administration of Lipo-B Plus injection. Furthermore, I hereby release and forever discharge for myself, my heirs, executors, administrators and assignees, **Physician's Weight Control and Wellness** owners and representatives from any and all claims, demands, actions and causes of action, which may result from voluntarily taking these injections.
